# RENEWPORT

**The first 18 months of RENEWPORT have passed and one of the most important project milestones has been achieved.**

## RES TOOLKIT

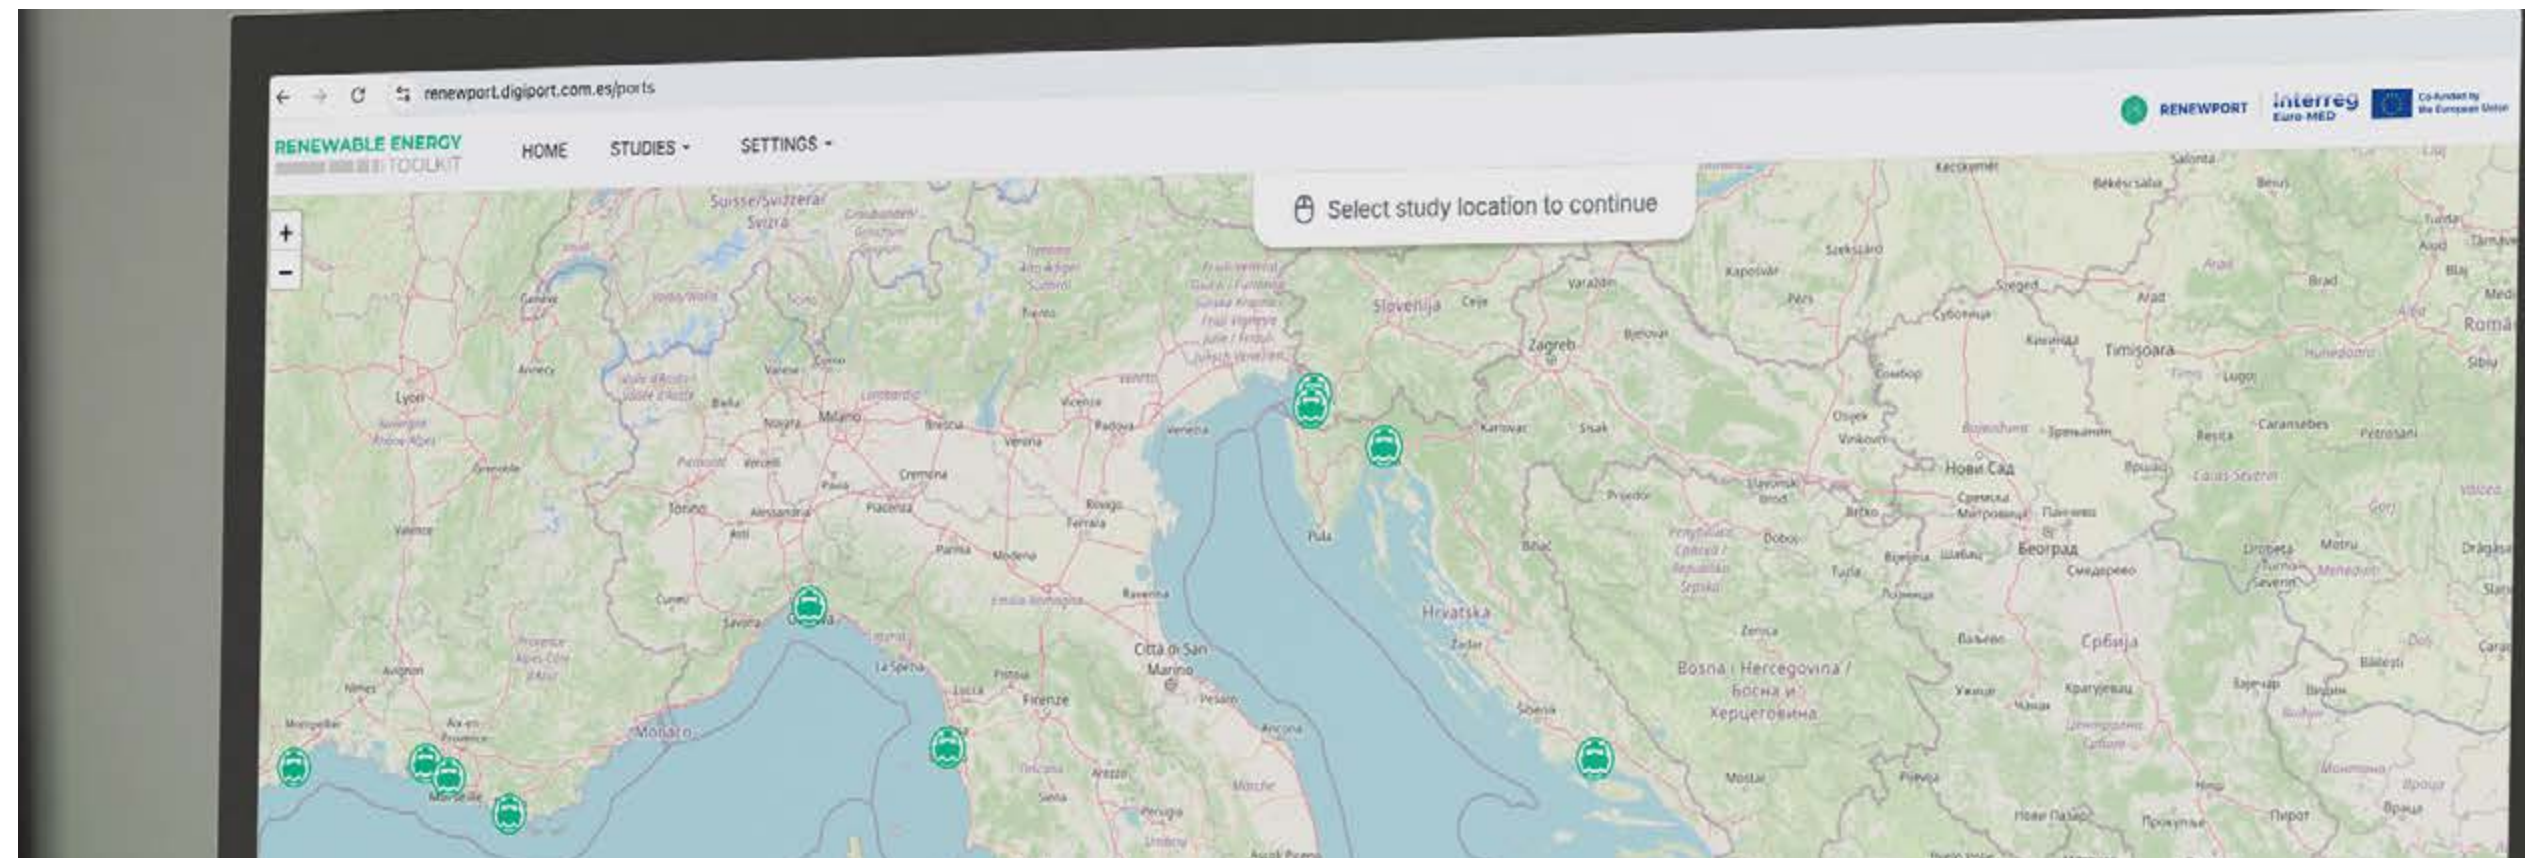

- Thanks to the input and collaboration of all project partners, a RES TOOLKIT has been developed, which is designed to empower ports in assessing their renewable energy potential.
- This cutting-edge online tool enables ports to accurately calculate the viable use of solar and wind energy resources based on their specific energy demands and geographical location.

## TECHNICAL ACTIVITIES

### RENEWABLE ENERGY TOOLKIT

**R**ENEWPORT aim is to accelerate the adoption of renewable energy in ports, reducing their carbon footprint and contributing to a healthier environment. The Toolkit developed within RENEWPORT will be instrumental in **helping ports identify and harness their natural resources** for a more sustainable operation.

**B**y offering a clear understanding of their renewable energy capacity, the RENEWPORT toolkit **facilitates informed decision-making and strategic planning** for integrating clean energy solutions.

## RES TOOLKIT

## TECHNICAL ACTIVITIES

**T**he RENEWPORT toolkit is **user-friendly** and provides actionable insights, making it an invaluable asset for **port managers, environmental planners, and sustainability professionals.**

**T**he functionality of the tool is based on obtaining the necessary data to perform the photovoltaic and wind energy calculations. The representation of this data could be independently or aggregated, **a general idea of the benefits of installing photovoltaic panels and/or wind turbines.** The information that will be shared by the tool will be that related to each case study that the user wishes to enter.

**TEST IT OUT!** [CLICK HERE](#)

## PROJECT MEETINGS

- RENEWPORT Project Partners met in  
**PIRAEUS, GREECE** ON 8TH APRIL 2025

FOR THE

### **4TH PROJECT STEERING COMMITTEE MEETING**

A great opportunity to get all together and analyze one of the first deliverables and one of the most important outputs of RENEWPORT, the RES toolkit for MED ports.

## MISSION PROMOTING GREEN LIVING AREAS

Regarding activities related to the Green Living Areas Mission, RENEWPORT attended several online meetings and workshops organized by **Governance Projects**, which were important opportunities to work together with other Thematic projects to:

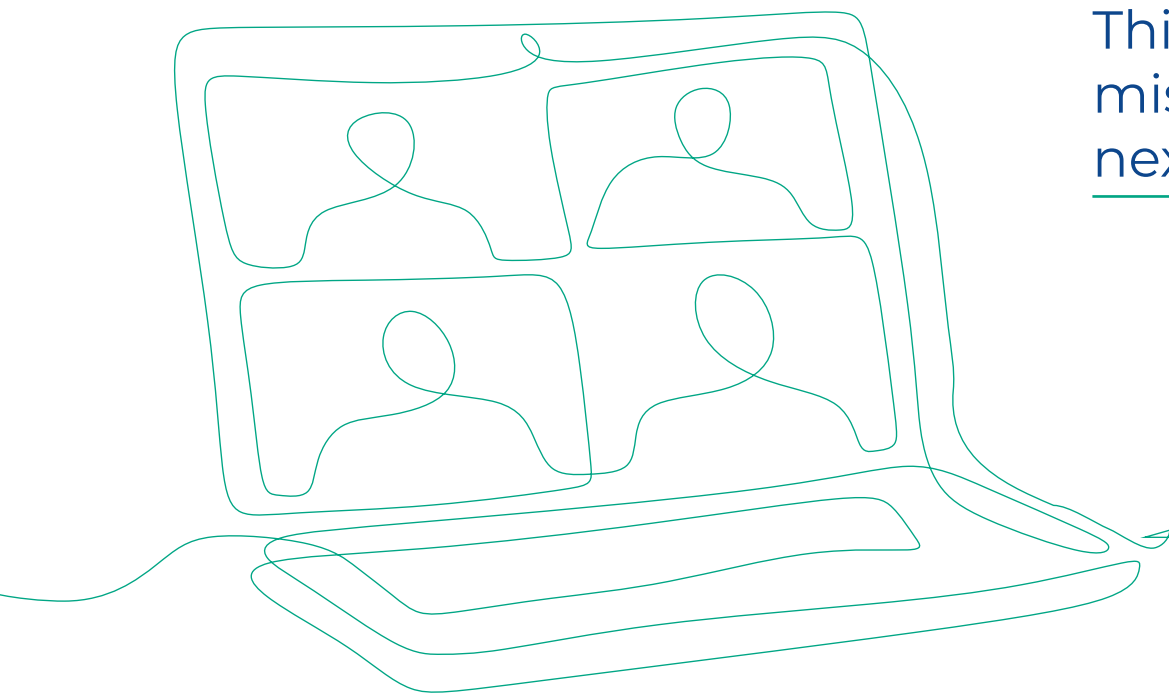

- **SELECT COMMON ACTIVITIES TO IMPLEMENT TOGETHER IN 2025**
- **EXCHANGE INFORMATION REGARDING THE PEER-REVIEW OF THE KEY DELIVERABLES AND OUTPUTS OF THE THEMATIC PROJECTS**

In May 2025, RENEWPORT attended the

### **2ND GATHERING OF THE GLA THEMATIC COMMUNITY IN BARCELONA.**

This event brought together representatives of thematic projects under the GLA mission, as well as other Interreg missions to strengthen collaboration and advance the next phase of the mission.
